

Hospitalization Cages

Lubb's Hospitalization Cages have been designed by and for veterinarians and are therefore prepared to comfortably accommodate animals in need of medical care, assisting veterinarians in this important task.

Manufactured entirely in Stainless Steel AISI 304, an excellent material given its strength, durability and ease of cleaning. It is an inert material ((does not react with any substance that is in contact with the structure) and non-toxic (does not cause intoxication).

Lubb's Hospitalization Cages have a modular system, are available in various sizes and adaptable configurations that will allow them to be adapted to the specific needs of any clinic.

Lubb has several options available that extend the functionalities of these cages as sewage for easy cleaning; grids which maintain animals comfortably in an elevated position, without contact with debris; support for serum bottle and infusion pump; special oxygenation door, etc.

Easy opening latch with high security system, which prevents animals from being able to open it. Central partition for separation of interior space. Rounded inner edges to maximize comfort and safety. Slope on the front of the floor prevents fluids from slipping out. Sewage is available as option.

Large high quality Tente wheels, with brakes, which promote and facilitate mobility.

Possibility of applying a PVC coated grid to promote hygiene, avoiding that the animal is in contact with debris. Available infusion pump and serum bottle support, easily applicable on the cage door, in the most suitable location. Cages may have an ample space with removable partitions, or spaces permanently separated.

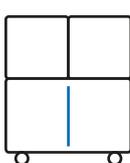

Oxygenation door in polycarbonate is an option which allows the insulation of the interior space of the cage.

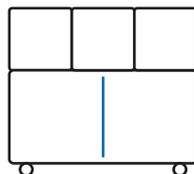

Lubb's Hospitalization Cages' standard configurations. Others available upon request, just talk to us.
